EFFECTIVENESS OF CARE: PREVENTION AND SCREENING

		20 16 11 15	
Measure	Measure Description	Measure Information/Documentation	Coding
		Required	
Care for Older Adults	Adults 66 years of age	Medication Review:	Functional Status Assessment:
(COA)	and older who had each	A review conducted by a prescribing	CPT : 99483
	of the following during	practitioner or clinical pharmacist in the MY.	CPT-CAT-II: 1170F
	the MY:	The member does not need to be present for	HCPCS: G0438, G0439
		the medication review. Any of the following are	
	 Medication review. 	acceptable:	Pain Assessment:
	 Functional Status Assessment (FSA). 	The presence of a medication list in the medical record with notation of the date	CPT-CAT-II: 1125F, 1126F
	 Pain Assessment. 	reviewed.	Medication Review (with Medication List):
		Dated notation that member is not taking	CPT: 90863, 99483, 99605, 99606
		any medications.	CPT-CAT-II: 1160F
		Transitional care management services	
		documented during the MY.	Medication List (with Medication Review):
		Criteria is not met if review performed by	CPT-CAT-II: 1159F
		an RN.	HCPCS: G8427
		Functional Status Assessment:	Transitional Care Management:
		At least one functional status assessment	CPT: 99495, 99496
		during the MY and the date it was performed.	
		Functional status assessment must include one	
		of the following:	Note: LOINC and SNOMED codes can be captured through electronic
		Notation that Activities of Daily Living	data submissions. Please contact your Account Executive for more
		(ADLs) were assessed or that at least five of	information.
		the following were assessed: bathing,	
		dressing, eating, transferring (e.g., getting	
		in and out of chairs), using toilet, walking.	
		Notation that Instrumental Activities of	
		Daily Living (IADLs) were assessed or at	
		least four of the following were assessed:	

shopping for groceries, driving or using public transportation, using the telephone, cooking or meal preparation, housework, home repair, laundry, taking medications, handling finances.

- Result of an assessment using a standardized functional status assessment tool.
- Criteria is **not** met by a fall assessment.

Pain Assessment:

At least one pain assessment during the MY and the date it was performed.

- Documentation that the patient was assessed for pain (which may include positive or negative findings for pain).
- Result of assessment using a standardized pain assessment tool.
- Criteria is **not** met by notation of only a pain management plan or only a pain treatment plan.
- Criteria is **not** met by notation of only screening for chest pain or only documentation of chest pain.

Note:

- Telephone, e-visit, or virtual check-in visits are acceptable for FSA and pain assessment.
- Exclude services provided in an acute inpatient setting.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Deceased at any time in the MY.

		 Common Chart Deficiencies: Medication Review: Medication review completed by RN. FSA: Documentation referencing patient living alone but not specifically that patient can perform ADLs or IADLs. FSA: Documentation of "normal" under review of systems without specifically addressing ADLs/IADLs. FSA: A functional status assessment limited to an acute or single condition, event, or body system. Pain: Patient not assessed for pain at visit. Pain: Diagnosis or medication related to pain or pain management plan but no documentation of pain assessment. 	
Measure	Measure Description	Measure Information/Documentation Required	Coding
Chlamydia Screening (CHL)	Members 16 – 24 years of age who were recommended for routine chlamydia screening, were identified as sexually active and who had at least one test for chlamydia during the MY.	Perform chlamydia screening each year on every 16- to 24-year-old member recommended for routine chlamydia screening and identified as sexually active. Chlamydia screening can be performed through a urine test. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. A pregnancy test in the MY and a prescription for isotretinoin (Retinoid) on the date of the pregnancy test or 6 days after the pregnancy test. A pregnancy test in the MY and an X-ray on	Chlamydia Tests: CPT: 87110, 87270, 87320, 87490, 87491, 87492, 87810 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

		the date of the pregnancy test or the 6 days after the pregnancy test. Common Chart Deficiencies: Not collecting/testing urine sample routinely at well-visits. Criteria is not met by notation of parental/patient refusal. Criteria is not met by notation that patient is not sexually active.	
Measure	Measure Description	Measure Information/Documentation Required	Coding
Lead Screening Children (LSC)	Children 2 years of age who had one or more capillary or venous lead blood test for lead poisoning at any time by their 2nd birthday.	Documentation in the medical record must include both of the following on or before the 2nd birthday: A note indicating the date the test was performed. The result or finding. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. Common Chart Deficiencies: Lab results not documented in the record. Documentation of result as "unknown." Documentation of a lead assessment versus a lead screening. Lead screening not ordered, not completed, or result not documented. Lead screening after the child's 2nd birthday. Results of screening performed at an outside lab, health department, or WIC office not included in record.	Lead Tests: CPT: 83655 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

Measure	Measure Description	Measure Information/Documentation Required	Coding
Oral Evaluation, Dental Services (OED)	Members under 21 years of age who received a comprehensive or periodic oral evaluation with a dental provider during the measurement year (MY).	Documentation in the medical record must contain evidence of a comprehensive or periodic oral evaluation by a dental provider. Dental providers include dentist, dental hygienist, dental assistant, dental therapist, endodontist, denturist, oral medicinist, oral/maxillofacial dentist/surgeon. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY.	CDT: D0120, D0145, D0150 Dental Provider Taxonomy: 122300000X, 1223D0001X, 1223D0004X, 1223E0200X, 1223G0001X, 1223P0106X, 1223P0221X, 1223P0300X, 1223P0700X, 1223S0112X, 1223X0008X, 1223X0400X, 1223X2210X, 122400000X, 124Q00000X, 125J00000X, 125K00000X, 125Q00000X, 126800000X, 204E00000X, 261QD0000X, 261QF0400X, 261QR1300X, 261QS0112X
Measure	Measure Description	Measure Information/Documentation Required	Coding
Topical Fluoride for Children (TFC)	Members 1 – 4 years of age who received at least two fluoride varnish applications during the measurement year (MY).	Application of fluoride varnish on two different dates of service in the MY. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY.	CDT: 99188, D1206
Measure	Measure Description	Measure Information/Documentation Required	Coding
Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents (WCC)	Members 3 – 17 years of age who had an outpatient visit with a PCP or OB/GYN and who had evidence of each of the following during the MY:	 BMI Percentile: Documentation must include height, weight, and BMI percentile during the MY. The height, weight, and BMI must be from the same data source. BMI percentile can be documented as a value or plotted on an age-growth chart. 	BMI Percentile: ICD10CM: Z68.51, Z68.52, Z68.53, Z68.54 Nutrition Counseling: CPT: 97802, 97803, 97804 HCPCS: G0270, G0271, G0447, S9449, S9452, S9470 ICD10CM: Z71.3

- BMI percentile documentation.
- Counseling for nutrition.
- Counseling for physical activity.

 Member-reported values (weight, height, BMI) can be captured during a telephone visit, e-visit, or virtual check-in.

Counseling for Nutrition:

Documentation of counseling for nutrition or referral for nutrition education during the MY. Examples include:

- Discussion of current nutrition behaviors (e.g., eating habits, dieting behaviors).
- Checklist indicating nutrition was addressed.
- Member received educational materials on nutrition during a face-to-face visit.
- Anticipatory guidance for nutrition.
- Weight or obesity counseling.
- Referral to the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC).

Counseling for Physical Activity:

Documentation of counseling for physical activity or referral for physical activity during the MY. Examples include:

- Checklist indicating physical activity was addressed.
- Member received educational materials on physical activity during a face-to-face visit.
- Anticipatory guidance for physical activity or weight/obesity counseling.
- Weight or obesity counseling.
- Discussion of current physical activity (e.g., sports activities, exercise routines).
- Exam for sport participation/sports physical.

Notes:

 Services may be rendered during a visit other than a well-child visit; however,

Physical Activity Counseling:

HCPCS: G0447, S9451

Encounter for Physical Activity Counseling: 202.5, Z71.82

Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

services specific to the assessment or treatment of an acute or chronic condition do not count toward the "Counseling for Nutrition" and "Counseling for Physical Activity" indicators.

 Services may be delivered during a telephone visit, e-visit, or virtual check-in. This includes member-reported data (e.g., height, weight, BMI) documented in the chart.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Deceased at any time in the MY.
- Diagnosis of pregnancy during the MY.

Common Chart Deficiencies:

- Height, weight, and BMI percentile not documented *each* year.
- BMI documented as a value and not as a percentile.
- BMI percentile documented as a range or threshold.
- BMI documented on an appropriate agegrowth chart but without name, DOB, or discernible DOS on the chart.
- BMI documented on weight or stature for age charts.
- Documentation of developmental milestones without notation of anticipatory guidance or education for physical activity.
- Missing counseling/education on physical activity and/or nutrition.
- Notation of "health education" or "anticipatory guidance" without specific mention of nutrition and/or physical

		 activity. Counseling on safety (e.g., "wears helmet" or "water safety") without specific mention of physical activity recommendations. Notation solely related to "screen time" without specific mention of physical activity recommendations. Documentation of diet or appetite "regular" or "good" without notation of counseling. Notation of encouragement to follow "healthy lifestyle" without specific mention of physical activity and/or nutrition. Screening forms/checklists that are not completed or do not have specific references to nutrition and/or physical activity. Documentation specific to the assessment or treatment of an acute or chronic condition (e.g., discussion of diet related for a child with diarrhea). Well-child services delivered in sick visit but not coded on claim.

The percentage of deliveries that received a prenatal care visit in the first trimester, on or before the enrollment start date, or within 42 days of enrollment in the organization.

• Postpartum Care. The percentage of deliveries that had a postpartum visit on or between 7 and 84 days after delivery.

complete obstetrical history, prenatal risk assessment or counseling/education).

- A basic physical obstetrical examination that includes auscultation for fetal heart tone, or pelvic exam with obstetric observations, or measurement of fundus height
- Evidence that a prenatal care procedure was performed (OB panel, ultrasound, etc.).

Postpartum visit to an OB/GYN or other prenatal care practitioner or PCP.

Documentation in the medical record must include a note indicating the date when the postpartum care visit occurred, and evidence of one of the following:

- Pelvic Exam: Colposcopy is not acceptable for a postpartum visit.
- Evaluation of weight, BP, breast, and abdomen: Notation of "breastfeeding" is acceptable for the "evaluation of breasts" component.
- Notation of postpartum care, including, but not limited to: Notation of "postpartum care," "PP care," "PP Checks," "6-week check."
- A preprinted "Postpartum Care" form in which information was documented during the visit.
- Perineal or cesarean incision/wound check.
- Screening for depression, anxiety, tobacco use, substance use disorder, or preexisting mental health disorders.
- Glucose screening for women with gestational diabetes.
- Documentation of any of the following: infant care or breastfeeding, resumption of intercourse, birth spacing, family planning,

sleep/fatigue, resumption of physical activity, attainment of healthy weight.

Note:

- Services provided during a telephone visit, e-visit, or virtual check-in are acceptable.
- Services that occur over multiple visits count toward Timeliness of Prenatal Care if all services are within the time frame established in the measure. Ultrasound and lab results alone are not considered a visit; they must be combined with an office visit with an appropriate practitioner in order to count for this measure.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Deceased at any time in the MY.
- Non-live birth.

Common Chart Deficiencies:

- Missing signature on charts so unable to determine provider type of services.
- Only initials on charts, so unable to determine provider type of services.
- Ultrasound and/or labs with no associated prenatal visit documented in measure time frame.
- Initial prenatal visit documented as intake with RN but no visit with OB/GYN or PCP.
- Diagnosis of pregnancy not documented in chart.
- Dates of service in progress notes do not align with dates on ONAF.
- ONAF not filled out completely.
- Visit in postpartum time frame does not

		reference pregnancy/delivery.

Measure	Measure Description	Measure Information/Documentation Required	Coding
Cardiac Rehabilitation (CRE)	The percentage of members 18 years and older who attended cardiac rehabilitation following a qualifying	The MY is 1/1 – 12/31. The Intake Period (IP) is a 12-month window that begins on July 1 of the year prior to the MY and ends on June 30 of the MY.	Cardiac Rehabilitation: CPT: 93797, 93798 HCPCS: G0422, G0423, S9472

	 Myocardial infarction. Percutaneous coronary intervention. Coronary artery bypass grafting. Heart and heart/lung transplantation. Heart valve replacement. Four rates are reported as the percentage of members who attended the specified number of cardiac rehabilitation sessions within the specified time after a qualifying event: Initiation: or more sessions within 30 days. Engagement 1: or more sessions within 90 days. Engagement 2: or more sessions within 180 days. Achievement: or more sessions within 180 days. 	The Episode Date (EP) is the most recent cardiac event during the IP, including myocardial infarction (MI), coronary artery bypass graft (CABG), percutaneous coronary intervention (PCI), heart or heart/lung transplant, or heart valve repair/replacement. For MI, CABG, heart or heart/lung transplant or heart valve repair/replacement, the EP is the date of discharge. For PCI, the EP is the date of service. For inpatient claims, the EP is the date of discharge. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. Receiving palliative care during the IP through the end of the MY. 66 years of age and older with frailty and advanced illness during the MY. 81 years of age and older with frailty during the IP through the end of the MY. Discharged from an inpatient setting with the following during the 180 days after the EP: MI, CABG, heart or heart/lung transplant, heart valve repair or replacement. PCI in any setting during the 180 days after the EP.	Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.
Measure	Measure Description	Measure Information/Documentation Required	Coding
Statin Therapy for	Males 21 – 75 years of	The Index Prescription Start Date (IPSD) is the	High-intensity statin therapy: Atorvastatin (40 – 80 mg),
Patients with	age and females 40 – 75	earliest dispensing date for any statin	Amlodipine-atorvastatin (40 – 80 mg), Rosuvastatin (20 – 40 mg),
rationits with	age and remaies 40 - 75	earnest dispensing date for any statin	Annourphic-activastatiii (40 – 60 mg), Nosuvastatiii (20 – 40 mg),

Cardiovascular Disease (SPC)

years of age during the measurement year (MY) who were identified as having clinical atherosclerotic cardiovascular disease (ASCVD) and met the following criteria.

Two rates are reported:

1. Received Statin Therapy:

Members who were dispensed at least one high- or moderate-intensity statin medication during the MY.

2. Statin Adherence 80%:

Members who remained on a high- or moderate-intensity statin medication for at least 80% of the treatment period.

medication of at least moderate intensity during the MY.

The Treatment Period (TP) is the period beginning on the IPSD through 12/31 of the MY.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Deceased at any time in the MY.
- Receiving palliative care any time in the MY.
- 66 years of age and older with frailty **and** advanced illness during the MY.
- Documentation of any of the following in the MY or year prior: Pregnancy, IVF treatment, dispensed prescription for Clomiphene, cirrhosis, end stage renal disease (ESRD), or dialysis.
- Documentation of any of the following in the MY: Myalgia, myositis, myopathy, or rhabdomyolysis.
- Documentation of myalgia or rhabdomyolysis caused by statins in the MY or at any time in the members history.

Common Chart Deficiencies:

 No documentation of review of medications at every visit. Simvastatin (80 mg), Ezetimibe-simvastatin (80 mg)

Moderate-intensity statin therapy: Atorvastatin (10 - 20 mg), Amlodipine-Atorvastatin (10 - 20 mg), Rosuvastatin (5 - 10 mg), Simvastatin (20 - 40 mg), Ezetimibe-simvastatin (20 - 40 mg), Pravastatin (40 - 80 mg), Lovastatin (40 mg), Fluvastatin (40 - 80 mg), Pitavastatin (1 - 4 mg)

	documentation of	retinal or dilated exam by an eye care	
	bilateral eye	provider in the year prior to the MY, where	Diabetes Mellitus without Complications (in Year Prior to MY with
	enucleation any time	results indicate retinopathy was not	Diabetic Retinal Screening):

present and the date when the exam was prior to 12/31 of the **ICD10CM:** E10.9, E11.9, E13.9 MY. performed. A chart or photograph indicating the date **Low Risk for Retinopathy** (none present in prior year): **CPT-CAT-II:** 3072F when the fundus photography was performed and evidence that an eye care professional (optometrist or Eye Exam without Evidence of Retinopathy: ophthalmologist) or qualified reading CPT-CAT-II: 2023F, 2025F, 2033F center reviewed the results, or that results were read by a system that provides **Eye Exam with Evidence of Retinopathy** (in the MY Only): artificial intelligence (AI) interpretation. CPT-CAT-II: 2022F, 2024F, 2026F Unilateral Eye Enucleation (with Bilateral Modifier or 2 Unilateral Hypertensive retinopathy is handled the same Enucleations More than 14 Days Apart): as diabetic retinopathy when reporting the Eye CPT: 65091, 65093, 65101, 65103, 65105, 65110, 65112, 65114 Exam indicator. • Positive for hypertensive retinopathy is counted as positive for diabetic retinopathy if diabetic retinopathy not documented. An eye exam documented as negative for Note: LOINC and SNOMED codes can be captured through electronic hypertensive retinopathy is counted as data submissions. Please contact your Account Executive for more negative for diabetic retinopathy if diabetic information. retinopathy not documented. **Common Abbreviations for Retinopathy:** NPDR (Non-proliferative diabetic retinopathy). PDR (Proliferative diabetic retinopathy). BDR (Background diabetic retinopathy). Mild BDR or PDR. Severe PDR. **Examples of Negative Exam:** Assessment of fundus and macula were "normal." Diabetes mellitus without ophthalmic complication. Retinal exam documented as "normal" is considered negative for retinopathy if diabetic retinopathy not documented.

		Note: Notation limited to a statement that included "Diabetes without complications" does not meet criteria.	
		 Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. Receiving palliative care any time in the MY. 66 years of age and older with frailty and advanced illness during the MY. Bilateral eye enucleation. 	
		Blindness is not an exclusion for a diabetic eye exam.	
		 Common Chart Deficiencies: Documentation of diabetic exam without results. Documentation of diabetic eye exam without provider (including credentials) of the exam. Documentation is not clear that patient had a dilated or retinal exam. Documentation not specific as to presence of retinopathy. 	
		 Incomplete or missing information from specialists or consulting providers. Documentation of "diabetes without complications" does not meet criteria.

Osteoporosis Management in Women Who Had a Fracture (OMW)	Women 67 – 85 years of age who suffered a fracture and who had either a bone or mineral density (BMD) test or prescription for a drug to treat osteoporosis in the six months after the fracture. Fractures of finger, toe, face, and skull are not included in this measure.	The MY is 1/1 – 12/31. The Intake Period (IP) is a 12-month window beginning 7/1 of the year prior to the MY and ending 6/30 of the MY. The IP is used to capture the first fracture. The Episode Date (EP) is an eligible encounter during the IP with a diagnosis of fracture. For outpatient, observation, or ER visit, the EP is the date of service. For inpatient stay, the EP is the date of discharge. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. Receiving palliative care during the IP through the end of the MY. 67 – 80 years of age with frailty and advanced illness during the IP through the end of the MY. 81 years of age and older with frailty during the IP through the end of the MY. Had a BMD test during the 730 days prior to the ED. Had a claim/encounter for osteoporosis therapy prior to the ED. Received a dispensed prescription or had an active prescription to treat osteoporosis during the 365 days prior to the ED.	Bone Mineral Density Tests: CPT: 76977, 77078, 77080, 77081, 77085, 77086 ICD10PCS: BP48ZZ1, BP49ZZ1, BP4GZZ1, BP4HZZ1, BP4LZZ1, BP4MZZ1, BP4NZZ1, BP4PZZ1, BQ00ZZ1, BQ01ZZ1, BQ03ZZ1, BQ04ZZ1, BR00ZZ1, BR00ZZ1, BR00ZZ1, BR00ZZ1, BR00ZZ1, BR00ZZ1, BR00ZZ1, BR00ZZ1, BR00ZZ1 Osteoporosis Medication Therapy: HCPCS: J0897, J1740, J3110, J3111, J3489 Long-Acting Osteoporosis Medications: HCPCS: J0897, J1740, J3489 Osteoporosis Medications List: Bisphosphonates: Alendronate, Alendronate-cholecalciferol, Ibandronate, Risedronate, Zoledronic acid Other Agents: Abaloparatide, Denosumab, Raloxifene, Romosozumab, Teriparatide Note: LOINC and SNOMED codes can be captured through electronic data submissions. Follow-Up After Emergency Department Visit for Mental Illness (FUM)	The percentage of emergency department (ED) visits for members 6 years of age and older	A follow-up visit with any practitioner, with a principal diagnosis of a mental health disorder or with a principal diagnosis of Intentional Self Harm and any diagnosis of a mental health	Visit Setting Unspecified: (With Outpatient POS and Principal Diagnosis of Mental Health or Principal Diagnosis of Intentional Self Harm with Any Diagnosis of Mental Health):

with a principal diagnosis of mental illness or Intentional Self Harm, who had a follow-up visit for mental illness.

Two rates are reported:

- The percentage of ED visits for which the member received follow-up within 30 days of the ED visit (31 total days).
- The percentage of ED visits for which the member received follow-up within 7 days of the ED visit (8 total days).

disorder within 7 and 30 days after ED visit. Include outpatient visits, behavioral health outpatient visits, intensive outpatient visits, partial hospitalizations, community mental health visits, electroconvulsive therapy visits, telehealth visits, psychiatric residential treatment, psychiatric collaborative care management, peer support services, and observation visits.

- Includes visits that occur on the date of the ED visit
- Telephone visits, e-visits, and virtual checkins are acceptable.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Deceased at any time in the MY.

		Required	
Follow-Up After Emergency Department Visit for Substance Use (FUA)	The percentage of emergency department (ED) visits for members 13 years of age and older with a principal diagnosis of substance use disorder (SUD), or any diagnosis of drug overdose, for which there was follow up. Two rates are reported: 1. The percentage of ED visits for which the member received follow-up within 30 days of the ED visit (31 total days). 2. The percentage of ED visits for which the member received follow-up within 7 days of the ED visit (8 total days).	A follow-up visit or a pharmacotherapy dispensing event within 30 days after the ED visit (31 total days). Includes visits that occur on the date of the ED visit. A follow-up visit or pharmacotherapy dispensing event within 7 days after the ED visit (8 total days). Include visits that occur on the date of the ED visit. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY.	Visit Setting Unspecified: (With Outpatient POS and with a Principal Diagnosis of AOD Abuse and Dependence, Substance Induced Disorders or Unintentional Drug Overdose, or with Mental Health Provider) (With Partial Hospitalization POS and with a Principal Diagnosis of AOD Abuse and Dependence, Substance Induced Disorders or Unintentional Drug Overdose, or with Mental Health Provider) (With Nonresidential Substance Abuse Treatment Facility POS and with any Diagnosis of AOD Abuse and Dependence, Substance Induced Disorders or Unintentional Drug Overdose, or with Mental Health Provider) (With Community Mental Health Center POS, and with Any Diagnosis of AOD Abuse and Dependence, Substance Induced Disorders or Unintentional Drug Overdose, or with a Mental Health Provider) (With Telehealth POS, and with Any Diagnosis of AOD Abuse and Dependence, Substance Induced Disorders or Unintentional Drug Overdose, or with Mental Health Provider): CPT: 90791, 90792, 90832, 90833, 90834, 90836, 90837, 90838, 90839, 90840, 90845, 90847, 90849, 90853, 90875, 90876, 99221, 99222, 99223, 99231, 99232, 99233, 99238, 99239, 99252, 99253, 99254, 99255 BH Outpatient: (With Any Diagnosis of AOD Abuse and Dependence, Substance Induced Disorders or Unintentional Drug Overdose, or with a Mental Health Provider)

			data submissions. Please contact your Account Executive for more information.
Measure	Measure Description	Measure Information/Documentation Required	Coding
Pharmacotherapy for Opioid Use Disorder (POD)	The percentage of new opioid use disorder (OUD) pharmacotherapy events with OUD pharmacotherapy for 180 or more days among members age 16 and older with a diagnosis of OUD.	Intake period: 12-month period that begins on 7/1 of the year prior to the MY and ends on 6/30 of the MY. The Treatment Period (TP) is the date of an OUD dispensing event or OUD medication administration event during the IP. No more than an 8-day gap is allowed during the TP. Note: • Methadone is not included in the medication lists for the measure. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: • In hospice or using hospice services any time in the MY. • Deceased at any time in the MY.	Members are identified through administrative and pharmacy claims. Opioid Abuse and Dependence Diagnosis: ICD10CM: F11.10, F11.120, F11.121, F11.122, F11.129, F11.13, F11.14, F11.150, F11.151, F11.159, F11.181, F11.182, F11.188, F11.19, F11.20, F11.250, F11.221, F11.222, F11.229, F11.23, F11.24, F11.250, F11.251, F11.259, F11.281, F11.282, F11.288, F11.29 Opioid Use Disorder Treatment Medications: Antagonist: Naltrexone (oral) Antagonist: Naltrexone (injectable) Partial agonist: Buprenorphine (sublingual tablet), Buprenorphine (injection), Buprenorphine (implant), Buprenorphine/naloxone (sublingual tablet, buccal film, sublingual film) Agonist: Methadone (oral) is only acceptable when billed on a medical claim. A pharmacy claim would be indicative of treatment for pain rather than OUD. Buprenorphine Implant: HCPCS: G2070, G2072, J0570 Buprenorphine Naloxone: HCPCS: J0572, J0573, J0574, J0575 Buprenorphine Oral: HCPCS: H0033, J0571 Buprenorphine Oral Weekly: HCPCS: G2068, G2079

		Methadone Oral: HCPCS: H0020, S0109 Methadone Oral Weekly: HCPCS: G2067, G2078 Naltrexone Injection: HCPCS: G2073, J2315 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

Measure Description Measure Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services in the MY. Measure Description Measure Information/Documentation Required Members 18 years of age and older who had an inpatient discharge for which each of the following occurred: Notification of Inpatient Admission (NIA): Documentation must include evidence of receipt of notification of inpatient admission on the day of admission through the 2 days following admission. Admission refers to the date of inpatient admission for an observation stay that turns into an inpatient

Discharge Information.

- Patient
 Engagement After
 Inpatient Discharge.
- Medication
 Reconciliation Post-Discharge.

Each qualifying discharge in the MY is measured.

Documentation must include evidence of receipt of notification of inpatient admission that includes evidence of the date when the documentation **was received**. Any of the following examples meet criteria:

- Communication between inpatient providers or staff and the member's PCP or ongoing care provider (e.g., phone call, email, fax).
- Communication about admission between emergency department and the member's PCP or ongoing care provider (e.g., phone call, email, fax).
- Communication about admission to the member's PCP or ongoing care provider through a health information exchange; an automated admission, discharge, and transfer (ADT) alert system; or a shared electronic medical record system.
- Communication about admission to the member's PCP or ongoing care provider from the member's health plan.
- Indication that the member's PCP or ongoing care provider admitted the member to the hospital.
- Indication that a specialist admitted the member to the hospital and notified the member's PCP or ongoing care provider.
- Indication that the PCP or ongoing care provider placed orders for tests and treatments any time during the member's inpatient stay.
- Documentation that the PCP or ongoing care provider performed a preadmission exam or received communication about a planned inpatient admission. The time frame that the planned inpatient admission must be communicated is not limited to the day of admission or the 2 days

Medication Reconciliation Intervention:

CPT-CAT-II: 1111F

The Notification of Inpatient Admission and Receipt of Discharge Information has no administrative reporting option. They are based on medical record review only.

Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

following; documentation that the PCP or ongoing care provider performed a preadmission exam or received notification of a planned admission prior to the admit date also meets criteria. The planned admission documentation or preadmission exam must clearly pertain to the admission.

Receipt of Discharge Information (RDI):

Documentation must include **evidence of receipt** of discharge information on the day of discharge through the 2 days following discharge.

Discharge information may be included in, but not limited to, a discharge summary or summary of care record or be located in structured fields in an Electronic Health Record (EHR). At a minimum, the discharge information must include all of the following:

- The practitioner responsible for the member's care during the inpatient stay.
- Procedures or treatment provided.
- Diagnoses at discharge.
- Current medication list.
- Testing results, or documentation of pending tests or no tests pending.
- Instructions for patient care postdischarge.

Patient Engagement After Inpatient Discharge (PE):

Documentation must include evidence of patient engagement within 30 days following discharge. Any of the following meets criteria:

- An outpatient visit, including office visits and home visits.
- A telephone visit.
- A synchronous telehealth visit where real-

time interaction occurred between the member and provider via telephone or video conferencing. Do not include patient engagement that occurs on the date of discharge.

An e-visit or virtual check-in.

Medication Reconciliation Post-Discharge (Med Rec):

Documentation in the outpatient medical record must include evidence of medication reconciliation and the date it was performed by a prescribing practitioner (including physician assistant), clinical pharmacist, or registered nurse, as documented on the date of discharge through 30 days after discharge (31 total days). Any of the following meet criteria:

- Documentation of the current medications with a notation that the provider reconciled the current and discharge medications.
- Documentation of the current medications with a notation that references the discharge medications (e.g., no changes in medications since discharge, same medications at discharge, discontinue all discharge medications).
- Documentation of the member's current medications with a notation that the discharge medications were reviewed.
- Documentation of a current medication list, a discharge medication list, and notation that both lists were reviewed on the same date of service.
- Documentation of the current medications with evidence that the member was seen for post-discharge hospital follow-up with evidence of medication reconciliation or review.

- Documentation in the discharge summary that the discharge medications were reconciled with the most recent medication list in the outpatient medical record. There must be evidence that the discharge summary was filed in the outpatient chart on the date of discharge through 30 days after discharge (31 total days).
- Notation that no medications were prescribed or ordered upon discharge.
- Only documentation in the outpatient chart meets the intent of the rate, but an outpatient visit is not required, and the member does not have to be present.

The following notations or examples of documentation do not count as numerator compliant for Notification of Inpatient Admission and Notification of Inpatient Discharge:

 Documentation that the member or the member's family notified the member's PCP or ongoing care provider of the admission or discharge.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Deceased at any time in the MY.
- Remained in an acute or nonacute facility from discharge through 12/1 of the MY.

Common Chart Deficiencies:

- Inpatient records cannot be used for TRC.
- NIA: Documentation that a provider sent the member to the ED does not meet

		 criteria. NIA: Documentation that the member or the member's family member notified the PCP or ongoing care provider of the admission does not meet criteria. NIA: Documentation of notification that does not include a time frame or date when the documentation was received does not meet criteria. NIA: Documentation that communication was sent to the PCP does not meet criteria — documentation of receipt is required. RDI: Discharge Summary not included in outpatient record or missing one or more of the 6 required elements. RDI: Documentation on Discharge Summary that communication was sent to the PCP does not meet criteria — documentation of receipt is required. PE: Patient engagement that occurs on the date of discharge, or more than 30 days after discharge, does not meet criteria. Med Rec: Completed by incorrect provider type. Med Rec: Documentation of current medications reviewed without reference to the hospitalization. Med Rec: Medication list found in both the discharge summary and outpatient record but no evidence the two were reconciled.

Avoidance of Antibiotic Treatment for Acute Bronchitis (AAB) This is also a measure (AAB-E) collected through claims and Electronic Clinical Data Systems. Please discuss options for a direct data feed with your Account Executive. Direct data feeds can improve provider quality performance and reduce the burden of medical record requests.	The percentage of episodes for members ages 3 months and older with a diagnosis of acute bronchitis/bronchiolitis that did not result in an antibiotic dispensing event. Higher rate indicates appropriate treatment of adults with acute bronchitis (i.e., the proportion for whom antibiotics were not prescribed).	The Intake Period (IP) is the 12-month window that begins 7/1 of the year prior to the MY and ends 6/30 of the MY. The Episode Date (EP) is the date of service for any outpatient, telephone, observation, or ED visit, e-visit or virtual check-in during the IP, with a diagnosis of acute bronchitis/bronchiolitis. Dispensed prescription for an antibiotic medication (AAB Antibiotic Medications List) on or three days after the EP. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. Common Chart Deficiencies: Additional/competing diagnosis requiring antibiotics not documented in visit or coded on claim.	Acute Bronchitis Diagnosis: ICD10CM: J20.3, J20.4, J20.5, J20.6, J20.7, J20.8, J20.9, J21.0, J21.1, J21.8, J21.9 AAB Antibiotic Medications: Aminoglycosides: Amikacin, Gentamicin, Streptomycin, Tobramycin Aminopenicillins: Amoxicillin, Ampicillin Beta-lactamase inhibitors: Amoxicillin-clavulanate, Ampicillin-sulbactam, Piperacillin-tazobactam First-generation cephalosporins: Cefadroxil, Cefazolin, Cephalexin Fourth-generation cephalosporins: Cefepime Lincomycin derivatives: Clindamycin, Lincomycin Macrolides: Azithromycin, Clarithromycin, Erythromycin Miscellaneous antibiotics: Aztreonam, Chloramphenicol, Dalfopristin-quinupristin, Daptomycin, Linezolid, Metronidazole, Vancomycin Natural penicillins: Penicillin G benzathine-procaine, Penicillin G potassium, Penicillin G procaine, Penicillin G sodium, Penicillin V potassium, Penicillin G benzathine Penicillinase-resistant penicillins: Dicloxacillin, Nafcillin, Oxacillin Quinolones: Ciprofloxacin, Gemifloxacin, Levofloxacin, Moxifloxacin, Ofloxacin Rifamycin derivatives: Rifampin Second-generation cephalosporin: Cefaclor, Cefotetan, Cefoxitin, Cefprozil, Cefuroxime Sulfonamides: Sulfadiazine, Sulfamethoxazole-trimethoprim Tetracyclines: Doxycycline, Minocycline, Tetracycline Third-generation cephalosporins: Cefdinir, Cefixime, Cefotaxime, Cefpodoxime, Ceftazidime, Ceftriaxone Urinary anti-infectives: Fosfomycin, Nitrofurantoin, Nitrofurantoin macrocrystals-monohydrate, Trimethoprim

Risk of Continued Opioid Use (COU)	Members 18 years of age and older who have a new episode of opioid use that puts them at risk for continued opioid use. Two rates are reported: 1. Members whose new episode of opioid use lasts at least 15 days in a 30-day period. 2. Members whose new episode of opioid use lasts at least 31 days in a 62-day period. A lower rate Indicates better performance.	The MY is 1/1 – 12/31. The Index Prescription Start Date (IPSD) is the earliest prescription dispensing date during the IP. 15-day: Prescriptions covering more than 15 calendar days during the 30-day period beginning on the IPSD through 29 days after the IPSD. 62-day: Prescriptions covering more than 31 calendar days during the 62-day period beginning on the IPSD through 61 days after the IPSD. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. Receiving palliative care during 12 months prior to the IPSD through 61 days after the IPSD. Cancer (Malignant Neoplasm) during 12 months prior to the IPSD through 61 days after the IPSD. Sickle Cell Anemia or HB S Disease during 12 months prior to the IPSD through 61 days after the IPSD.	Opioid Medications: Benzhydrocodone, Buprenorphine (transdermal patch and buccal film), Butorphanol, Codeine, Dihydrocodeine, Fentanyl, Hydrocodone, Hydromorphone, Levorphanol, Meperidine, Methadone, Morphine, Opium, Oxycodone, Oxymorphone, Pentazocine, Tapentadol, Tramadol The Opioid Medications List excludes: Injectables. Opioid-containing cough and cold products. Single-agent and combination buprenorphine products used to treat opioid use disorder for medication-assisted treatment (buprenorphine sublingual tablets, buprenorphine subcutaneous implant, and all buprenorphine/naloxone combination products). Ionsys® (fentanyl transdermal patch). This is for inpatient use only and is available only through a restricted program under a Risk Evaluation and Mitigation Strategy (REMS). Methadone when prescribed for the treatment of opioid use disorder. Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

Measure	Measure Description	Measure Information/Documentation Required	Coding
Well-Child Visits in the First 30 Months of Life (W30)	The percentage of members 15 months – 30 months of age who had the recommended well-child visits with a PCP. Two rates are reported: 1. 6 or more visits on or before the 15-month birthday. 2. 2 or more visits between the 15-month birthday plus 1 day and the 30-month birthday.	Documentation from the medical record must include a note indicating a well visit with a PCP and the date the well-child visit occurred. Telehealth, telephone visits, and online assessments do not meet the criteria. Well-child/EPSDT visit criteria is based on American Academy of Pediatrics Bright Futures: Guidelines for Health Supervision of Infants, Children and Adolescents. https://www.aap.org/en/practice-management/bright-futures/bright-futures-materials-and-tools/ Note: Preventive services may be rendered on visits other than well-child visits. Medical records must include documentation of preventive services. Chronic or acute condition assessment and treatment are excluded from this provision. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY.	Use age-appropriate preventive E&M. Encounter for Well Care: ICD10CM: Z00.00, Z00.01, Z00.110, Z00.111, Z00.121, Z00.129, Z00.2, Z00.3, Z01.411, Z01.419, Z02.5, Z02.84, Z76.1, Z76.2 Well Care Visit: CPT: 99381, 99382, 99383, 99384, 99385, 99391, 99392, 99393, 99394, 99395, 99461 HCPCS: G0438, G0439, S0302, S0610, S0612, S0613 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

		Children being seen for sick visits only and no documentation/claims/encounter data related to well visit services provided.	
Measure	Measure Description	Measure Information/Documentation Required	Coding
Child and Adolescent Well-Care Visits (WCV)	The percentage of members 3 – 21 years of age who had at least one comprehensive well-care visit with a PCP or OB/GYN practitioner during the MY.	Documentation from the medical record must include a note indicating a visit with a PCP or OB/GYN, the date when the well-child visit occurred. Telehealth, telephone visits, and online assessments do not meet the criteria. Well-child/EPSDT visit criteria is based on American Academy of Pediatrics Bright Futures: Guidelines for Health Supervision of Infants, Children and Adolescents. https://www.aap.org/en/practice-management/bright-futures/bright-futures-materials-and-tools/ Note: Preventive services may be rendered on visits other than well-child visits. Medical records must include documentation of preventive services. Chronic or acute condition assessment and treatment are excluded from this provision. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MY. Deceased at any time in the MY. Common Chart Deficiencies: Children or adolescents being seen for sick visits only and no documentation/claims/encounter data related to well-visit services provided.	Use age-appropriate preventive E&M. Encounter for Well Care: ICD10CM: Z00.00, Z00.01, Z00.110, Z00.111, Z00.121, Z00.129, Z00.2, Z00.3, Z01.411, Z01.419, Z02.5, Z02.84, Z76.1, Z76.2 Well Care Visit: CPT: 99381, 99382, 99383, 99384, 99385, 99391, 99392, 99393, 99394, 99395, 99461 HCPCS: G0438, G0439, S0302, S0610, S0612, S0613 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Biopsies are diagnostic and are not valid as 	Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

cervical cytology (Pap test/high-risk human papillomavirus [hrHPV]) co-testing within the last 5 years. a primary cervical cancer screening.

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MY.
- Deceased at any time in the MY.
- Receiving palliative care any time in the MY
- Evidence of a hysterectomy with no residual cervix. Must specify "complete," "total," "radical," "abdominal," or "vaginal" hysterectomy.
- "Cervical agenesis" or "acquired absence of the cervix."
- Hysterectomy in combination with documentation that the patient no longer needs Pap testing/cervical cancer screening.

Gender Exclusions:

- Evidence that a patient was born a male.
- Members with Male sex assigned at birth.
- Documentation patient is "transitioning from male to female" or has undergone sex reassignment surgery from male to female.
- Documentation of "binary," "non-binary," "transgender," or "transsexual" would **not** be considered an exclusion.

Common Chart Deficiencies:

- Unclear if member's cervix is absent.
- Hysterectomy is not documented in the chart sufficiently to exclude member from measure.
- Member-reported data not documented with sufficient information to show the screening was completed with a result in

Measure	Measure Description	 the measure time frame. Pap/HPV test completed but results not documented. Missing clear documentation on transgender patients (not clear that member is appropriate for the screening or if screening ordered/completed). Measure Information/Documentation Required	Coding

Measure	Measure Description	Measure Information/Documentation Required	Coding
Blood Pressure Control for Patients with Hypertension (BPC-E) This is a measure collected through claims and Electronic Clinical Data Systems. Please discuss options for a direct data feed with your Account Executive. Direct data feeds can improve provider quality performance and reduce the burden of medical record requests.	The percentage of members 18 – 85 years of age who had a diagnosis of hypertension (HTN) and whose most recent blood pressure (BP) was <140/90 mm Hg during the measurement period.	 BP must be latest reading in the MY and must occur on or after the diagnosis of HTN. BP readings taken on the same day as a diagnostic test or diagnostic or therapeutic procedure that requires a change in diet or change in medication on or one day before the test or procedure, with the exception of fasting blood tests, are not used. BP readings taken during an inpatient stay or ED visit are not used. When multiple BP measurements occur on the same date, the lowest systolic and lowest diastolic BP reading will be used. If no BP is recorded during the MY, the member is "not controlled." Services provided during a telephone visit, e-visit, or virtual check-in are acceptable. Member-reported data documented in medical record is acceptable if BP captured with a digital device and documented in the medical record with date BP taken. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: 	Systolic and Diastolic Result: CPT-CAT-II: Most Recent Systolic less than 130: 3074F Most Recent Systolic 130 – 139: 3075F Systolic greater than or equal to 140: 3077F Most Recent Diastolic less than 80: 3078F Most Recent Diastolic 80 – 89: 3079F Most Recent Diastolic greater than or equal to 90: 3080F Hypertension Diagnosis: ICD10CM: I10 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

standardized instrument and, if screened positive, received follow-up care.

Two rates are reported:

1. Depression Screening:

The percentage of members who were screened for clinical depression using a standardized instrument.

2. Follow Up on Positive Screen:

The percentage of members who received follow-up care on or up to 30 days after the date of the first positive screen.

depression screening instrument.

- Acceptable tools for the Adolescent 12-17 population include PHQ-9; PHQ-9M; PHQ-2; BDI-FS; CESD-R; EPDS; PROMIS Depression.
- Acceptable tools for the Adult 18+
 population include PHQ-9; PHQ-2; BDI-FS; BDI-II; CESD-R; DADS; GDS; EPDS;
 M-3; PROMIS Depression, CUDOS.

Follow up which meets criteria:

- Outpatient, telephone, or virtual check-in visit.
- Depression case management encounter.
- A behavioral health encounter.
- Dispensed antidepressant medication.
- Additional depression screening on a full-length instrument indicating no depression or no symptoms that require follow up on the same day as a positive screen on a brief screening instrument.
- A diagnosis of encounter for exercise counseling

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MP.
- Deceased at any time in the MP.
- Bipolar disorder in the year prior to the MP.
- Depression that starts during the year prior to the MP.

Measure	Measure Description	Measure Information/Documentation Required	Coding
Utilization of the PHQ-9 to Monitor Depression Symptoms for Adolescents and Adults (DMS-E) This is a measure collected through claims and Electronic Clinical Data Systems. Please discuss options for a direct data feed with your Account Executive. Direct data feeds can improve provider quality performance and reduce the burden of medical record requests.	The percentage of members 12 years of age and older with a diagnosis of major depression or dysthymia who had an outpatient encounter with a PHQ-9 score present in their record in the same assessment period as the encounter.	The Measurement Periods (MP) are: January 1 through April 30. May 1 through August 31. September 1 through December 31. The PHQ-9 assessment does not need to occur during a face-to-face encounter; phone-based, e-visit, virtual check-in, or electronic secure messaging is acceptable. Note: Standardized instruments are useful in identifying meaningful change in clinical outcomes over time. Guidelines for adults recommend that providers establish and maintain regular follow-up with patients diagnosed with depression and use a standardized tool to track symptoms. For adolescents, guidelines recommend systematic and regular tracking of treatment goals and outcomes, including assessing depressive symptoms. The PHQ-9 tool assesses the nine DSM, Fourth Edition, Text Revision (DSM-IV-	Diagnosis: Major Depression or Dysthymia: ICD10CM: F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.9, F34.1 Encounter Performed: Interactive Outpatient Encounter: CPT: 90791, 90792, 90832, 90834, 90837, 98960, 98961, 98962, 98966, 98967, 98968, 98970, 98971, 98972, 98980, 98981, 99078, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, 99242, 99243, 99244, 99245, 99341, 99342, 99344, 99345, 99347, 99348, 99349, 99350, 99381, 99382, 99383, 99384, 99385, 99386, 99387, 99391, 99392, 99393, 99394, 99395, 99396, 99397, 99401, 99402, 99403, 99404, 99411, 99412, 99421, 99422, 99423, 99441, 99442, 99443, 99457,99458, 99483, 99492, 99493, 99494, 99510 HCPCS: G0071, G0155, G0176, G0177, G0409, G0410, G0411, G0463, G0512, G2010, G2012, G2250, G2251, G2252, H0002, H0004, H0031, H0034, H0035, H0036, H0037, H0039, H0040, H2000, H2001, H2010, H2011, H2012, H2013, H2014, H2015, H2016, H2017, H2018, H2019, H2020, S0201, S9480, S9484, S9485, T1015 UBREV: 0510, 0513, 0516, 0517, 0519, 0520, 0521, 0522, 0523, 0526, 0527, 0528, 0529, 0900, 0901, 0902, 0903, 0904, 0905, 0907, 0911, 0912, 0913, 0914, 0915, 0916, 0917, 0919, 0982, 0983

		TR) criterion symptoms and effects on functioning and has been shown to be highly accurate in diagnosing patients with persistent major depression, partial remission, and full remission. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MP. Deceased at any time in the MP. Bipolar disorder in the MP. Personality disorder in the MP. Pervasive development disorder in the MP.	Note: LOINC and SNOMED codes can be captured through electronic data submissions. Immunizations for Adolescents (IMA-E) When coding E&M and vaccine administration services on the same date, you must append modifier 25 to the E&M. This is measure collected through claims and Electronic Clinical Data Systems. Please discuss options for a direct data feed with your Account Executive. Direct data feeds can improve provider quality performance and reduce the burden of medical record requests.	Adolescents 13 years of age in the MY who are up to date on recommended routine vaccines for meningococcal; tetanus, diphtheria toxoids, and acellular pertussis (Tdap); and human papillomavirus (HPV).	Adolescents 13 years of age who had the following: • Meningococcal MCV with DOS on or between the 10 th and 13 th birthdays or evidence of antigen or anaphylaxis due to the vaccine on or before the 13 th birthday. • Tdap or TD with DOS on or between the 10 th and 13 th birthdays or evidence of antigen, anaphylaxis, or encephalitis due to the vaccine on or before the 13 th birthday. • HPV — any of the following: • 3 doses with different dates of service on or between the 9 th and 13 th birthdays. • 2 doses with at least 146 days between the 1st and 2nd dose on or between the 9th and 13 th birthdays. • Anaphylaxis due to the vaccine on or before the 13 th birthday. • Evidence of antigen. Documentation: • A note indicating the name of the specific antigen and the date of the immunization. • A certificate of immunization prepared by an authorized health care provider or agency including the specific dates and types of immunizations administered. Required Exclusions: Members who meet any of the following criteria are excluded from the measure: • In hospice or using hospice services any	Meningococcal Vaccine: CVX: 32, 108, 114, 136, 147, 167, 203, 316 CPT: 90619, 90623,90733, 90734 Tetanus, Diphtheria, & Acellular Pertussis Vaccine (Tdap): CVX: 115 CPT: 90715 HPV Vaccine: CVX: 62, 118, 137, 165 CPT: 90649, 90650, 90651 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

		 time in the MY. Deceased at any time in the MY. Common Chart Deficiencies: Immunizations administered outside of the appropriate time frames. PCP charts do not contain records when immunizations administered elsewhere (i.e., health departments, school clinics, urgent care facilities). HPV doses are not at least 146 days apart when only 2 doses administered. A note that "member is up to date" with all immunizations does not constitute compliance due to insufficient data. Parental refusal does not meet compliance. Td (Tetanus, Diphtheria Toxoids) does not meet criteria for Tdap. Meningococcal Recombinant (serogroup B) (MenB) does not meet criteria for the Meningococcal vaccine.

discuss options for a direct data feed with your Account Executive. Direct data feeds can improve provider quality performance and reduce the burden of medical record requests.

Two rates are reported.

1. Depression Screening:

The percentage of deliveries in which members were screened for clinical depression using a standardized instrument during the postpartum period.

2. Follow up on Positive Screen:

The percentage of deliveries in which members received follow-up care within 30 days of screening positive for depression.

2; BDI-FS; CESD-R; EPDS; PROMIS Depression.

Acceptable tools for the Adult 18+
population include PHQ-9; PHQ-2; BDI-FS;
BDI-II; CESD-R; DADS; EPDS; M-3; PROMIS
Depression, CUDOS.

Follow up which meets criteria:

- Outpatient, telephone, or virtual check-in visit.
- Depression case management encounter.
- A behavioral health encounter.
- Dispensed antidepressant medication.
- Additional depression screening on a fulllength instrument indicating no depression or no symptoms that require follow up on the same day as a positive screen on a brief screening instrument.
- Exercise counseling

Required Exclusions:

Members who meet any of the following criteria are excluded from the measure:

- In hospice or using hospice services any time in the MP.
- Deceased at any time in the MP.

Social Need Screening and Intervention (SNS-E) This is a measure collected through claims and Electronic Clinical Data Systems. Please discuss options for a direct data feed with your Account Executive. Direct data feeds can improve provider quality performance and reduce the burden of medical record requests.	The percentage of members who were screened, using prespecified instruments, at least once in the measurement period (MP) for unmet food, housing, and transportation needs and received a corresponding intervention within 30 days of screening positive. The measurement period (MP) is 1/1 – 12/31.	Screenings documented on pre-specified instruments: Food Insecurity: Accountable Health Communities (AHC) Health-Related Social Needs (HRSN) Screening Tool. American Academy of Family Physicians (AAFP) Social Needs Screening Tool. Health Leads Screening Panel. Hunger Vital Sign (HVS). Protocol for Responding to and Assessing Patients' Assets, Risks & Experiences (PRAPARE). Safe Environment for Every Kid (SEEK). U.S. Household Food Security Survey. U.S. Adult Food Security Survey. U.S. Child Food Security Survey. U.S. Household Food Security Survey. Well Food Security Survey. We Care Survey. WellRx Questionnaire. Housing Instability, homelessness, and housing inadequacy: Accountable Health Communities (AHC) Health-Related Social Needs	Food Intervention: CPT: 96156, 96160, 96161, 97802, 97803, 97804 HCPCS: S5170, S9470 Homelessness/Housing Intervention: CPT: 96156, 96160, 96161 Transportation Interventions: CPT: 96156, 96160, 96161 Note: LOINC and SNOMED codes can be captured through electronic data submissions. Please contact your Account Executive for more information.

(HRSN) Screening Tool.

- American Academy of Family Physicians (AAFP) Social Needs Screening Tool.
- Children's HealthWatch Housing Stability Vital Signs.
- Health Leads Screening Panel
- Protocol for Responding to and Assessing Patients' Assets, Risks & Experiences (PRAPARE).
- We Care Survey.
- WellRx Questionnaire.

Transportation insecurity:

- Accountable Health Communities (AHC) Health-Related Social Needs (HRSN) Screening Tool.
- American Academy of Family Physicians (AAFP) Social Needs Screening Tool.
- Comprehensive Universal Behavior Screen (CUBS).
- Health Leads Screening Panel.
- Protocol for Responding to and Assessing Patients' Assets, Risks & Experiences (PRAPARE).
- PROMIS
- WellRx Questionnaire

Interventions are required for any element (food, housing, and transportation) found positive upon screening. Interventions must correspond to the positive screening and must be within 30 days of positive screen (day of screen and 30 days following for a total of 31 days). Interventions include:

- Assistance.
- Assessment.

 Counseling. Coordination. Education. Evaluation of Eligibility. Provision. Referral.
Required Exclusions: Members who meet any of the following criteria are excluded from the measure: In hospice or using hospice services any time in the MP. Deceased at any time in the MP.
